

APELI SAMWEL

Production Support & NOC Engineer with over 3 years of experience in supporting 24x7 production systems in a multi-country environment. Has hands-on experience in Incident Triage, Monitoring, Backend/API, as well as Service Level Agreement-driven Resolution, along with working closely with various teams to ensure "stable live systems." Has in-depth knowledge in supporting systems that are built using Node.js technology, and is actively acquiring hands-on experience in AWS technology as well.

EXPERIENCE

BURN MANUFACTURING, Nairobi—NOC Engineer

MARCH 2025- PRESENT

- Provide Tier 2/3 production support for backend applications, APIs, and databases, ensuring high availability and fast incident resolution.
- Deliver customer and client technical support during incidents, outages, and service degradation, coordinating with internal teams and vendors.
- Support PHP-based applications (Laravel) in production, handling minor application issues, log analysis, and maintenance-related troubleshooting.
- Validate and troubleshoot REST APIs using Postman, verifying authentication, payloads, latency, and response behavior during outages and deployments.
- Monitor system and service availability using AWS CloudWatch and alerting tools, responding to incidents within defined SLA timelines.
- Perform backend investigations using SQL queries to verify transactions, data integrity, and system behavior during incidents.
- Track production fixes, configuration changes, and collaboration workflows using Git to support controlled change management.
- Execute automation scripts and run scheduled jobs using Docker containers to support operational tasks and reduce manual intervention.
- Collaborate with engineering teams to identify root causes, test fixes, and confirm successful resolution in production.
- Document incidents, fixes, and operational procedures to support continuous improvement and knowledge sharing.

NOC Engineer | Production Support | Technical & IT Support Technician | Tier 2/3 Support

CORE SKILLS

- Network Operations Center (NOC) – Tier 2 / Tier 3 Support
- PHP Application Support (Laravel – support & maintenance exposure)
- REST API Integration & Testing (Postman)
- Log Analysis & Error Troubleshooting
- SQL Queries & Data Validation (MySQL / PostgreSQL concepts)
- Basic Frontend Debugging (HTML, CSS, JavaScript)
- Version Control (Git – collaboration & change tracking)
- Incident & Problem Management (Jira, GLPI)
- Incident & Problem Management (Jira, GLPI)

iSON Technologies, Nairobi — NOC Engineer

AUGUST 2023 - APRIL 2025

As the Network Operations Engineer, I have supported 13 countries across East, West, Central, and Southern Africa, ensuring seamless network operations and service continuity. My key responsibilities include:

- Supported network, voice, and service operations across 13 countries in East, West, Central, and Southern Africa, ensuring high availability of critical enterprise systems.
- Provide Tier 2/3 production support for backend applications, APIs, databases, and supporting infrastructure in a live 24/7 environment.
- Perform advanced incident triage, log analysis, and metrics review to isolate application, network, or infrastructure-related issues.
- Provided operational support for Cisco Unified Communications Manager (CUCM) environments, including:
 - Monitoring VoIP service availability and call performance
 - Troubleshooting call setup, call drops, registration, and endpoint connectivity issues
 - Escalating complex CUCM and voice routing issues with detailed diagnostics
- Act as an escalation point for complex incidents, collaborating with software engineers, DevOps, and infrastructure teams.
- Participate in root cause analysis (RCA), documenting findings and recommending preventive improvements.
- Maintain detailed incident reports, SOPs, and operational documentation.

- Hardware & Software Troubleshooting
- Network Fundamentals (LAN, Wi-Fi, TCP/IP, DNS, VPN)
- System Monitoring & Alert Handling (AWS CloudWatch, Nagios)
- Application & Production Support
- Technical Documentation & Knowledge Bases
- Customer & Client Technical Support

Public Service Commission , Nairobi— Intern

APRIL 2023 - SEPTEMBER 2023

As an intern in the Public Service Commission.I was deployed in the State Department for Cooperatives: Policy and Standards Section. My roles included the following:

- Participating in drafting strategic and operational plans, such as the financial year work plan and strategic initiatives for the Standards and Development Committee.
- Provided first-line technical support to staff in the Policy and Standards, Records Management, and Finance departments.
- Played a major role in hardware troubleshooting, including desktops, laptops, printers, peripherals, and basic network devices.
- Supported basic frontend issue diagnosis, assisting users and teams with HTML, CSS, and JavaScript-related display or functionality issues.
- Assisted with basic network support tasks involving LAN, WAN, VPN, DNS, and TCP/IP configurations and connectivity checks
- Using Microsoft Office tools for data entry, document preparation, and various nation wide cooperative societies analyses required by the Policy and Standards department.
- Managing and preserving vital records, developing record storage plans, and recording accounts from various cooperatives.
- Assisting with office workload, including dispute resolution for SACCOS, data analysis, report writing, and drafting work plans
